

Figure 1 is a line graph showing Glucose (mg/dL) on the Y-axis (ranging from 100 to 350) versus Time on the X-axis (ranging from 0.35 to 0.65). Two curves are plotted: Calibration Visit 1 (solid line with filled circles) and Calibration Visit 2 (dashed line with open circles). Both curves show a similar pattern of peaks and troughs, indicating good agreement between the two visits. Handwritten numbers '10' and '11' are present near the peaks of the curves.
